Some background knowledge for the reader

- In this manual presentation, we present how the participant of a virtual hackathon event can view the roadmap of the specific event.
- For being able for a participant to see the roadmap of an event and its details, we assume that the participant has already registered the specific event.

Below, the “**This is my first roadmap**” is displayed along with a description about the roadmap and its steps.

Virtual Hackathon

To use this roadmap in an event you need to copy the link and paste it to the desired location.

This is my first roadmap

Description

Contrary to popular belief, Lorem Ipsum is not simply random text. It has roots in a piece of classical Latin literature from 45 BC, making it over 2000 years old. Richard McClintock, a Latin professor at Hampden-Sydney College in Virginia, looked up one of the more obscure Latin words, consectetur, from a Lorem Ipsum passage, and going through the cites of the word in classical literature, discovered the undoubtable source. Lorem Ipsum comes from sections 110.32 and 110.33 of “de Finibus Bonorum et Malorum” (The Extremes of Good and Evil) by Cicero, written in 45 BC. This book is a treatise on the theory of ethics, very popular during the Renaissance. The first line of Lorem Ipsum, “Lorem ipsum dolor sit amet..”, comes from a line in section 110.32.

The standard chunk of Lorem Ipsum used since the 1500s is reproduced below for those interested. Sections 110.32 and 110.33 from “de Finibus Bonorum et Malorum” by Cicero are also reproduced in their exact original form, accompanied by English versions from the 1914 translation by H. Rackham.

Steps

			
Conception and initiation	Definition and planning	Launch or execution	Performance and control

	
Finalization	Latest test step

Virtual Hackathon

Definition and planning

Description

The second project management step is definition and planning. Once your project's been given the go-ahead, it's time to stamp out the scope, schedule, and cost of a project. This is usually done by drawing up a project plan, scope or charter, then calculating a budget, the resources needed, and a schedule. This is also the stage where you want to create a risk management plan: identify potential problems or obstacles and develop procedures to prevent them, or deal with them quickly if they do happen.

It's worth noting that all of these items are subject to change during the project. Orders could be delayed or problems could arise, so when drawing up these plans you need to give some leeway and predict the most likely area for delays. You should also note the flexibility of the teams working on the project, as if a delay occurs you may need to divert resources in order to hit the deadline.

Thanks!
